1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hansen et al (cited by applicant) or Horrell. Wedge 16 and inside annular surface 22 of the Hansen device define a channel as recited in claim 15. Additionally the channel may be said to be spiral, inclined and planar as recited in claim 17.

The rejected claims also read on a threaded container closure or cap such as that taught in Horrell. The threads define a channel that extends as claimed and that can be said to be spiral, inclined and planar.

3. Claims 1-14 are allowed.

4. Claims 16, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
